

Puppy Vaccine Schedule and Pricing:

Puppies should begin their vaccination series at 8 weeks of age. They will typically receive 3 sets of booster vaccines at 4 week intervals, this is dependent on the age that they begin their series. If they begin their series later than 8 weeks of age they may require only 2 sets of boosters, but this will be determined by your veterinarian at the time of their first visit.

Core vaccines are as follows:

- Distemper Virus, Adenovirus Type 2, Parainfluenza and Parvovirus:
 - These three can be given separately but here at Delton we offer it in a combination vaccine (DA2PP)
 - This vaccine requires 3 boosters total, one at each of the puppy series visits.
- Rabies Virus:
 - This vaccine can be given to puppies after 16 weeks of age and is usually given at the last puppy series visit.

Non-core vaccines are dependent on each individual puppy's lifestyle which will be discussed with your veterinarian. This includes:

- Bordetella bronchiseptica (Kennel Cough):
 - If this vaccine is recommended by your veterinarian it is generally given at the second puppy visit.

Note: There are a variety of non-core vaccines available but most of them are not necessary in Alberta and only need to be considered if you plan on traveling with your pet outside of Alberta.

Vaccine series:

8 weeks: First puppy visit is \$113.00^{+GST} and includes:

- ★ Veterinarian Exam
- ★ First DA2PP vaccine
- ★ Nail Trim

12 weeks: Second puppy visit is \$83.70^{+GST} and includes:

- ★ Veterinarian Exam
- ★ Second DA2PP booster vaccine
- ★ Nail Trim

Not included but may be recommended: Bordetella (kennel cough) vaccine, which costs \$42.33^{+GST}

16 weeks: Third and final puppy visit is \$83.70^{+GST} and includes:

- ★ Veterinarian Exam
- ★ Third/Final DA2PP booster vaccine
- ★ Rabies Vaccine
- ★ Nail Trim

Other things to consider:

The veterinarian may recommend 2-3 rounds of deworming for your new puppy, the cost will depend on the type of dewormer and the weight of your puppy. This will be discussed at the visit and will range in cost from approximately \$15-\$30^{+GST}.

We also recommend a form of identification such as a microchip, this can be placed at any of the puppy visits or you may opt to administer it at the time of the Spay or Neuter procedure. The cost for the microchip is \$75.00^{+GST}.

Be sure to talk to your veterinarian about when the right time to spay or neuter your puppy is. One of our technicians will send you a personalized quote after your puppy's visit.
